## 4. Chapter: Anthropology Environment, Adaption & Subsistence

### 1. Anthropology Environment, Adaption & Subsistence Questions

#### 4.1.1. Which is NOT a reason for the relationship between culture areas an...

Author: Richley Crapo

Which is NOT a reason for the relationship between culture areas and natural environments?

Please choose only one answer:

- Environmental boundaries are sometimes barriers to the movement of cultural traits.
- Adaptations to similar environments are likely to yield similar cultures.
- Diffusion occurs readily between cultures with similar environmental adaptations.
- Environments determine the characteristics of culture.

#### 4.1.7. Which of the following is NOT true of optimal foraging theory?

Author: Richley Crapo

Which of the following is NOT true of optimal foraging theory?

Please choose only one answer:

- Explains why some foods are emphasized more than others.
- Explains why some foods are regularly ignored by foragers.
- Claims that foraging societies are most likely to be found in areas of optimal resources.
- Likelihood of a resource being used is proportional to the calories per unit of effort required to obtain and prepare it
